

IT'S
time FOR
A **change!**

 **ACCU
COUNTER™** 

**...fastest, most accurate pull-tab
counting method around!**

Newer, IMPROVED Model:

- Virtually Zero % Error In Test Result
- Unequaled Speed
- New, Quiet Action
- Easy-View, Angled Control Panel
- Simplified Setup

VIRTUALLY eliminates
THE hassles OF
PULL-TAB counting,
sorting
AND bundling.

The new AccuCounter™ automatic pull-tab counting machine is a dream come true for gaming hall operators. It saves time, labor and guesswork!

Simply load a stack of tickets into the hopper and set the controls. The AccuCounter™ does the rest – much faster and more accurately than the method you're using now!

PRECISION
engineered FOR THE
GAMING INDUSTRY.

Designed with a state-of-the-art microprocessor for unmatched accuracy and speed. With the touch of a button, it can be programmed to count lots of 1 to 50 tickets – continuously – with an adjustable time delay between bundles. The machine also features a resettable total count to assure an accurate account of all tickets processed during a day, at any time.

THE **advantages**
REALLY add up!

Easy Setup

- Easy to follow directions
- Settings can be changed at the touch of a button
- Stop button halts count instantly and stops tickets from advancing

**Illuminated on Screen
